

ENVIRONMENTAL SUSTAINABILITY OFFICE POLICY

POLICY STATEMENT

In recognition of environmental sustainability, Patriot Electric Ltd. is dedicated to fostering a culture that promotes protecting the environment, conserving resources, and recycling used materials.

SUSTAINABLE ACTIONS & BEHAVIOURS

Patriot Electric Ltd. undertakes the following actions and behaviours in support of its stance on environmental sustainability.

LIGHTING

Use energy efficient Light Emitting Diode (LED) and Fluorescent luminaires in office and promote the sale of said luminaires to customers and clients.

Use and promote the use of room & space occupancy sensors, programmable timers, dimmers, and lighting control systems.

HEATING

Employ and promote the use of programmable thermostats in order to control room temperature and reduce heating during non-active hours.

Office window blinds are automatically drawn via control circuitry in order to optimize exposure to incoming sun radiation.

RECYCLING & COMPOSTING

Materials including, but not limited to, paper, cardboard, printer ink cartridges, batteries, lighting bulbs, lighting fixtures, aluminum, copper, and electronics are recycled according to their respective recycling programs.

Food scraps are composted as part of the Victoria Green Waste program.

Promote an office 'no-plastic' policy. On-site water filtration system allows for the use of employee-brought reusable water bottles, thus removing the need for wasteful plastic water bottles.
