

Patriot Electric Ltd.

We recently renovated our entire common areas of our nine story condominium in Victoria and had the great fortune of being introduced to David Moss and the fine employees of Patriot Electric.

From the first meeting when choosing trades there was no doubt or hesitation in choosing Patriot. We interviewed several companies but David Moss impressed us most with his knowledge, professionalism, honesty and his accurate quotation. He and his staff were always at the site when they promised to be there. They were clean, courteous, efficient and just a pleasure to have around. All jobs were completed perfectly!

There were five to six other trades working at the same time and Patriot employees were always patient and understanding when having to return at another time to complete their work. They never complained! This is very unusual and unique to find this today with busy work schedules etc. Our other trades also commented on the positive work ethic of Patriot employees and their fine workmanship.

Patriot is an outstanding company and an example for all similar size companies in Victoria to aspire to. I highly recommend them for the Business Award of the Year and am certain that any client of David Moss would feel the same. I look forward to working with them in the future.

Regards
